### EXAMINER'S AMENDMENT

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/12/2009 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with O. M. Zaghmout on 08/11/2009.

The application has been amended as follows:

130. (Presently Amended) A process for enhanced recovery~~extraction~~ of recombinant insulin ~~comprising the process comprises:~~

(a) expressing the insulin in yeast, wherein the expressed insulin is secreted into the culture medium;

(b) adding a water miscible organic solvent to the fermentation culture broth, wherein the fermentation culture broth contains the secreted insulin and the yeast, wherein the water miscible organic solvent is selected from the group consisting of ethanol, isopropanol, t-butanol, acetic

acid, dimethylformamide, dimethylsulfoxide, acetonitrile, dioxan, ethylene glycol, and propylene glycol, and wherein the water miscible organic solvent optionally contains additives;

(c) clarifying the fermentation culture broth containing the added water miscible organic solvent by centrifugation and decanting the supernatant from the pellet;

(d) isolating the insulin from the supernatant.

(a) treating expressed insulin present in bound form after the completion of fermentation in an expression broth/culture medium containing the expressing cells with water miscible organic solvents selected from the group consisting of ethanol, isopropanol, t-butanol, acetic acid, dimethylformamide, dimethylsulfoxide, acetonitrile, dioxan, ethylene glycol, and propylene glycol, optionally along with additives; and

(b) isolating the insulin from the treated broth culture.

Claims 132, 133, 136, 137 and 140 are as previously presented.

Cancel claim 141.

Amend claim 142 to be dependent on claim 130.

143 (New). The process of claim 130 further comprising

(e) resuspending the pellet of step (c) with a miscible organic solvent selected from the group consisting of ethanol, isopropanol, t-butanol, acetic acid, dimethylformamide, dimethylsulfoxide, acetonitrile, dioxan, ethylene glycol, and propylene glycol, and wherein the water miscible organic solvent optionally contains additives;

(f) centrifuging the resuspended pellet and decanting the supernatant;

(g) isolating the insulin from the supernatant of step (f).

On page 15, line 26 of the specification, insert the heading "Brief Description of the Drawings" before "Figure 1".

Support for the amendment to claim 130 is found in the original specification on page 5 and in examples 1-4. Support for new claim 143 is found in the original specification in example 5.

The following is an examiner's statement of reasons for allowance: The closest prior art of Wang et al. ("Human Insulin from a Precursor Overexpressed in the Methylophilic Yeast *Pichia pastoris* and a Simple Procedure for Purifying the Expression Product," *Biotechnology and Bioengineering*, **2001**, 73, 74-79) teaches a method of expressing insulin yeast wherein the insulin is secreted into the fermentation broth, centrifuging the fermentation broth to remove the yeast and purifying the insulin from the supernatant. The reference neither teaches nor discloses the step of adding a water miscible organic solvent to the fermentation culture prior to the centrifugation step. Further, the reference does not provide any motivation to make such a modification to the method. Thus, the methods of claims 130, 132, 133, 136, 137, 140, 142 and 143 are both novel and unobvious over Wang et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTINA BRADLEY whose telephone number is (571)272-9044. The examiner can normally be reached on Monday-Thursday, 8:30 A.M. to 4:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on (571) 272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
